

Queen Victoria - 4d Surface Printed Issues.

The 4d Carmine postage stamp was introduced on **31st July 1855** specifically for postage to France. However, the early issues are somewhat complex, so are only briefly described here.

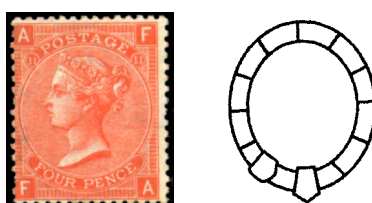

The first two plates (plates 1 & 2) had no corner letters (see above) and were printed on a variety of different papers and three types of watermark (small, medium, and large garter). The substantive issue was the 4d Rose on ordinary white paper and large garter watermark which was issued in **January 1857**.

Plates 3 and 4 utilised the same basic design but with the inclusion of small corner letters representing the position on the printing plate of each impression. The two plates can be distinguished by a Roman 'I' near the left-hand corner square on plate 1, and a hair-line and 'II' for plate 4. Stamps from plate 3 were introduced on **15th January 1862**, and from plate 4 on **16th October 1862**. Plates 5 and 6 were neither registered nor put to press.

Due to their early nature, none of the above stamps have yet been reported with a Perfin!

Large white corner letters were introduced **4th July 1865** starting with plate 7, along with a colour change to Vermilion. Plates 7-14 can be found with this arrangement.

Large coloured corner letters were introduced on **1st March 1876** starting with plate 15 still in Vermilion. The colour changed to Sage-green, issued **12th March 1877**, which involved plates 15 and 16, and again to Grey-brown on **15th August 1880** which only involved plate 17.

The final variation to mention is the change of watermark to Imperial Crown which only involved plates 17 and 18. Stamps with this watermark were introduced *8th December 1880*. This 4d stamp was replaced when the 'Lilac & Green' issue was introduced 1st April 1884.

| TOTALS for the 4d Surface Printed issues. | | | | | |
